DETAILED ACTION

Examiner acknowledges receipt of remarks filed 05/13/04. No claim amendment was presented in the amendment. Claims 1-52 are pending, with claims 26-52 withdrawn from consideration.

Response to Amendment

A listing of all the claims ever presented in the case must be supplied in ascending numerical order with the status identifier in parenthesis following each claim number, the text of all pending claims including withdrawn claims, markings to show changes. See MPEP 714.03 for details.

Claim cancellation does not take place in the remarks. Applicants are invited to provide a proper amendment as required under 37 CFR 1.121 (as revised June 30, 2003) regarding amendments submitted on or after July 30, 2003.

Claim Rejections - 35 USC § 103

1. Claims 1-25 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Barry et al. (EP 1 050 314 A1) and further in view of Dixiabo et al. (US 5,515,117).

Applicants argue that Barry does not disclose or suggest that the zeolites be coated.

Applicants argue that there is nothing in Dixiabo that suggests the reactable coatings "to coat anything other than a contact lens." Applicants further state that the instant specification provides showing of surprising results showing that the lens comprising the coated zeolites retained more silver ions that the lens comprising uncoated zeolite by assaying the release of silver from contact lenses comprising coated zeolites and contact lenses comprising uncoated zeolites.

Art Unit: 1615

2. Applicants' arguments filed 05/13/04 have been fully considered but they are not persuasive.

Barry discloses antimicrobial ocular lens that is made form polymeric material and the polymeric material contains inorganic antimicrobial agent, which is a zeolite. The polymeric material contains the zeolite and in a broad general sense, the polymeric material coats the zeolite. Thus contrary to applicants' assertion, the zeolite is contained in the polymer and the polymer thus serves as a coating. Examiner agrees with applicants that Dixiabo discloses coating contact lens. The coating material is however antimicrobial. The coated zeolites comes from the teaching of Barry and the disclosure of Dixiabo compliments Barry since Dixiabo's polymeric material containing antimicrobial agent is used to coat contact lens to provide effective antimicrobial component. The polymeric material in Dixiabo is silane and the silane contains or coats antimicrobial agent. The suggestion and disclosure for coated antimicrobial agent is found in both prior art references.

- 3. Regarding applicants' argument of selective combination, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
- 4. Regarding applicants' argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into

Application/Control Number: 10/029,526

Art Unit: 1615

account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

No claim is allowed.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
